MESKER BROS IRON WORKS

NINETEENTH EDITION.

ST. LOUIS, MO., U. S. A.

G. B. SMITH. **SMITH'S BAKERY AND CANDY KITCHEN.** J. J. SMITH.

SMITH BLOCK.

MESKER & BRO. *Wappinger's Falls, N. Y., Dec. 28, 1895.*

Gentlemen:—Our New Block, now finished, is the pride of the town; we found no trouble to put up the work. The Steel Columns and Galvanized Iron Work present a solid and artistic-looking front. The imitation of large Stone Blocks on the Main Street side is immense, and finished as we have it, looks just like real Blocks of Brown Stone. The first of the three Fronts (the one to left of cut) we purchased of you three years ago looks as well and is as sound as the day we put it up, and, all things considered, we are well satisfied that we used your Galvanized Iron and Steel Fronts in preference to any other, or anything else, being considerably cheaper than the plainest building of brick or stone. Wishing you every success, we are

Truly yours,

(SIGNED) *SMITH BROS.*

January 16, 1902.—We, at this date, wish to add to the above letter that the Fronts now are in as good condition as when first erected.

(SIGNED) *SMITH BROS.*

COMPLETE [G]ALVANIZED STEEL FRONTS.

Fire Proof Fronts.

The following designs illustrate absolutely fire-proof Fronts. That part above first-story columns, except window frames and sash, is made of galvanized sheet steel with the ornamentation, or enrichment, pressed directly into the steel, and cannot be damaged by fire. We refer you to letters on pages 10 and 13, and can positively state that our Fronts are practically indestructible by fire.

SEND FOR DISCOUNTS.

We furnish the Fronts complete as shown by the illustrations, **EXCLUDING** hardware, sash weights, cords, inside finish, wood lintel and wood backing; these articles are to be furnished by the owner of building or by contractor. We also furnish with each Front shipped a complete set of full-size detail drawings, with explicit instructions, which will enable any mechanic, whether experienced in this particuiar line or not, to erect the work.

MESKER & BROTHER, ST. LOUIS, MISSOURI, U. S. A.

We have made the manufacture of Galvanized Iron Fronts our specialty for the past forty years, and have been able to successfully introduce them throughout the United States and Canada. We claim for our Fronts, as chief advantages, economy in price, artistic and modern design, durability, perfect and practical construction. To those contemplating the erecting of buildings we furnish, free of charge, drawings for Front to suit their requirements, and of modern design, upon receiving the size or frontage of lot, and such other information as may be necessary. For remodeling buildings where old Fronts are to be taken out and new ones substituted, our Complete Galvanized Iron Fronts present such overwhelming advantages in cost and appearance as to defy competition.

All prices quoted in this Catalogue are for work F. O. B. cars St. Louis, and are subject to 30% Discount.

Evansville, Ind., April 13, 1895.

Messrs. Mesker & Bro., St. Louis, Mo.

Gentlemen:—The Galvanized Iron Front you put up for me about 28 years ago is as good to-day as ever, and has cost nothing for repairs since its completion. Of course it has been painted and sanded, which gives it the appearance of richly cut and carved stone-work. You probably remember it is three stories in height, and is altogether an attractive front, comparing favorably with buildings of recent erection. Respectfully yours,

(Signed) CHARLES VIEHLE.

COMPLETE GALVANIZED STEEL FRONTS.

The Nineteenth and latest Edition of our Illustrated Catalogue is presented to the building public, with new and modern designs for Complete Galvanized Iron Fronts, and supersedes all former issues. In this catalogue we show our latest designs, in which we have embodied all practical improvements, with the special object in view of adding to the former commendable qualities of our Fronts, at the same time reducing their cost considerably, and feel confident that a careful study of our Catalogue by architects, contractors, and others contemplating the construction or remodeling of buildings will be of invaluable service to them in perfecting and cheapening their designs, thereby combining durability and elegance of appearance with economy in price. Our Fronts are distributed throughout the country, and if those contemplating building desire to ascertain their special merits, they may write any of our customers in their vicinity (addresses will be furnished), from whom they can obtain the required information, and we are beforehand convinced that it will, in every instance, be highly commending our work.

All prices quoted in this Catalogue are for work F. O. B. cars St. Louis, and are subject to 30% Discount.

MESKER & BROTHER, ST. LOUIS, MISSOURI.

HIGHEST AWARD, GOLD MEDAL, UNIVERSAL EXPOSITION, ST. LOUIS, 1904.

Burlington, Kans., March 16, 1893.

Messrs. Mesker & Bro., St. Louis, Mo.

Gentlemen:—More than eight years ago you made for us a Galvanized Iron Front, three stories high, and we will say right here that we put it all up in less than two days with inexperienced hands who never saw a Galvanized Iron Front before; all we went by was the drawing and instructions that you furnished. We gave it two good coats of paint, and it stands as good to-day as when it was first set up; and we therefore recommend your fronts to any one contemplating building, for there is nothing that can compare with them. Wishing you continued success, we remain,

Yours truly,

(Signed) R. WINGREN.

Siloam Springs, Ark., Feb. 18, 1895.

Messrs. Mesker & Bro., St. Louis, Mo.

Gentlemen:—Siloam has just had the greatest fire in her history. Several brick buildings across the street from ours burned to the ground last eve, and our front, with the exception of the glass and wood work, is in just as good condition as ever. The glass was cracked and broken by the intense heat, and is a total loss, and the wood work of the show sash was badly charred, but the galvanized iron work is in splendid shape. What can you furnish new glass for? Answer immediately. Yours truly,

(Signed) E. C. BARTELL & SON.

The continued increase of our trade has compelled us to increase our capacity correspondingly. We have added largely to our buildings, occupying at present 110,000 square feet of floor space. Our works are provided with steam power of ample capacity throughout, and equipped with the most modern and powerful machinery for every portion of the work; not only have we adopted for the purpose the most serviceable inventions of modern times, but wherever these have fallen short to meet the requirements of our specialties, we have had, regardless of expense, machines constructed to effectually answer our purposes, and provided as we are with every possible labor-saving device suggested by ingenuity and the requirements of our trade, we are enabled to produce our work of quality and with promptness equalled by none. With increased facilities, a large and complete stock of all materials and ornaments pertaining to our productions and specialties on hand, we can safely enter upon the present season with the full assurance and promise to our customers that their orders, however large, will be filled with the same accuracy and promptness for which we have established such firm reputation, and which to maintain shall as heretofore be our principal aim and consideration.

USE ROBINSON'S CIPHER

Clifton, Texas. Feb. 3rd, '98

Messrs. Mesker & Bro., St. Louis, Mo.
Dear Sirs:- Please send us at once the following glass:-
One piece 34 by 80 inches, plate, One piece 24 by 80 inches D.S.A.
Two pieces 24 by 26 inches, D.S.A., Two pieces 26 by 34 inches D.S.A.
We had a fire in our town and the above glass were destroyed from the front we bought of you last. The fire originated in a wooden building just eight inches from our new store building, and while the wooden structure was completely destroyed, our Mesker front was damaged but very slightly the greatest damage being the breaking of the six glass. It has greatly advertised your fronts, as every one who witnessed the fire predicted that the front would be totally destroyed. Under the circumstances, we will appreciate your closest price on the lights ordered, and will thank you to forward promptly.

Yours Truly,
Kell & Gibbs

ALL PRICES QUOTED IN THIS CATALOGUE ARE FOR WORK F. O. B. CARS ST. LOUIS, AND ARE SUBJECT TO 30% DISCOUNT.

The increased demand for our complete Modern House Fronts, and their general introduction throughout the United States and Canada, fully demonstrates their true merits and commendable qualities. Our construction, as well as our columns, are fully protected by letters of patents, as to secure to us exclusively the right to produce our Modern Fronts, brought to their present state of perfection by years of experiments and large expenditures; and while others may try to produce imitations, none can approach us in point of architectural beauty, expediency and perfection of construction or durability; and as to price, our facilities for manufacturing, the low rates of freight due to our patent construction, and close nesting and packing in consequence, and the purchase of all materials pertaining to our complete Fronts in large quantities and for cash, enable us to distance all competition. Our designs are all original; we adopt modern ideas as soon as presented and where practical. We personally supervise every distinct branch of our business, and devote our undivided attention to same. Every department is in charge of a competent superintendent, especially selected and fit for that particular branch. It is our aim to have our complete Fronts introduced into every town and city in the United States, and to that effect solicit the correspondence of owners, contractors and builders, assuring them prompt attention, faithful and careful execution of any and all orders entrusted to our care.

All Glass of Double Strength. Galvanized Iron Work above first story Columns. One wood lookout shipped with every ten-foot section of Galvanized Iron Work for fastening same.

COMPLETE GALVANIZED STEEL FRONTS.

Galvanized Iron Fronts, as manufactured by us, are no longer an experiment; their reputation is firmly established. Their merits are so prominent and manifold that they have taken the lead among modern Fronts for business buildings. Their comparatively low price brings them within the reach of everyone contemplating building.

All designs for Fronts illustrated in this Catalogue can be changed to suit any width or height of building. Our stock designs can be furnished at least fifty per cent. cheaper than special work, but we are prepared to submit very close quotations on original designs, when plans of same are sent to us with specifications. Designs with the notation, "No Iron Work lower story," signify that our prices on these Fronts do not include Sill, Vestibule Plate, nor columns for lower story, as in some cases owners or contractors desire to use wood.

NO IRON WORK LOWER STORY

The Three Illustrations on This Page Show Our Fronts for Frame Structures.

Having had so many inquiries in the past, asking if our Fronts can be used on frame buildings we have in this issue of our Catalogue devoted a special page illustrating same, and at the same time state that all our Fronts are applicable to any building (either new or old), of any material or any construction, with flat, low, or high-pitched roof, any width or height. In many cases customers prefer in corner Fronts, as shown on page 40, to have lower story on sides brick and upper stories frame, with our Galvanized Iron Finish. This makes a fine building; in fact, makes side look equal to front at less cost than common brick work. For old frame buildings, the outsides of which are in a dilapidated state while the inside is in a fair condition, the substitution of one of our Fronts, and covering the sides with Galvanized Sheet Steel, rock-face stone or brick siding, will make a building of handsome appearance at a very small cost. If you will send us a rough sketch of the ground plan of your building, with lower story arrangements, correct width from out to out, story heights, and total height of structure from ground to roof, with your selection of any design shown in this catalogue, we will promptly submit drawing, free of cost, with our lowest net prices.

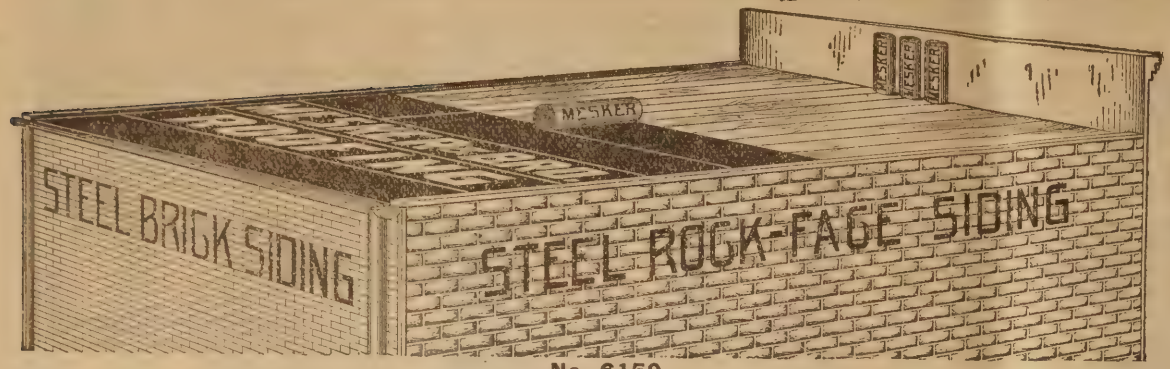
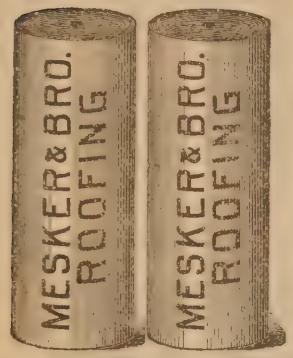
MESKER & BROTHER, ST. LOUIS, MISSOURI, U. S. A.

STEEL SIDING & ROOFING.



No. 6150.

PREPARED ROOFING.



Our **Two Ply Prepared Roofing** is 32 inches wide and about 41 feet in length, put up in rolls, each containing 108 square feet. Allowing for laps, every roll will cover 100 SQUARE FEET, or one square, 10 by 10 feet.

Price, per square, complete, Two-Ply - - $2.50.

It is adapted to buildings of every class, to all climates; it is not affected by gases, acids, steam or other vapors.

The question of durability is an important one, and we do not hesitate to say that our Prepared Roofing, when properly applied and well taken care of will last almost a life time.

The merit of this Roofing consists principally in its superior mechanical construction, uniformity and high grade of material used, neatness, durability and security, ease and facility for laying on roof, and can be successfully used on all degrees of pitch.

It will not rust or rattle, and as there is no expansion or contraction the roof will never leak from such causes. It can be applied equally well on old or new buildings, and directions, so simple that any one can follow them, accompany each roll.

We do not sell part of a roll. If your surface measures 970 square feet, order 1000 feet, or 10 squares, A little extra material is often needed for around chimneys, openings, etc.

Prices upon application.

ROCK FACE STONE AND BRICK SIDING.

Made of Sheet Steel, Painted or Galvanized

Perfectly imitates Rock Face Stone and brick and is the most attractive Metal Siding ever offered to the trade.

It is easily and quickly applied by any good mechanic, without using special tools, directly to studding or over sheathing; lays perfectly smooth and where an ELEGANT and ARTISTIC appearance is wanted it is rapidly taking the place of Corrugated Iron and other styles of Metal Siding and proving entirely satisfactory. It is suitable for siding purposes on Dwellings, School Houses, Business Blocks, Court Houses, Auditoriums, etc., costing no more than the best wood siding and about one-fifth that of brick.

In point of appearance, durability, cheapness, and as a protection against fire, we claim it has no equal.

We stamp our siding, using the best soft steel, thereby obtaining clear and sharp impressions, both sides painted but not striped.

Always lay with concave or hollow part of mortar line on outside.

PRICES UPON APPLICATION.

The above prices for window and door caps are for openings from 30 to 40 inches in width between brick work. Other sizes will be charged extra. The square head window and door caps illustrated above can be changed to segment head caps at an expense of 75 cents additional each.

Directions for Ordering Window and Door Caps.

Orders should specify if caps are wanted for square, segment, or circular head openings. For segment or circular head openings give radius. Always state width of opening between brick work in inches, and give the distance that the frame is recessed from face of wall. State if caps are to be built in brick work, or put on building already erected, as a difference in construction of cap is necessary.

EMBOSSED SHEET STEEL CEILING.

Cheaper Than Wood Ceiling.

No. 6190

PERMANENT, durable, fire-proof and ornamental. Will not stain, crack nor fall off like plaster, nor shrink nor burn like wood. It is furnished in sheets 30 inches wide, 96 inches long, and is therefore put up at a much lower cost than any other style metal ceiling. It can be applied over an old wood or plaster ceiling without removing either, and does not require one-fourth as much furring as ceilings made in smaller sheets.

Shows a 30-in. by 96-in. Sheet Embossed Ceiling.

It is cheaper than beaded, corrugated, plaster or wood ceiling and can be put up in one-half the time. Any one can apply it easily. It is shipped not painted. Ceilings should be painted, after being placed in position, a color that will reflect as much light as possible. The wood strips or battens are not furnished, as they can be purchased at any lumber yard and the freight saved. When ordering give exact inside measurements. Shipments can be made in a few days.

Price $3.75 per square, including border F. O. B. St. Louis, subject to 30% discount.

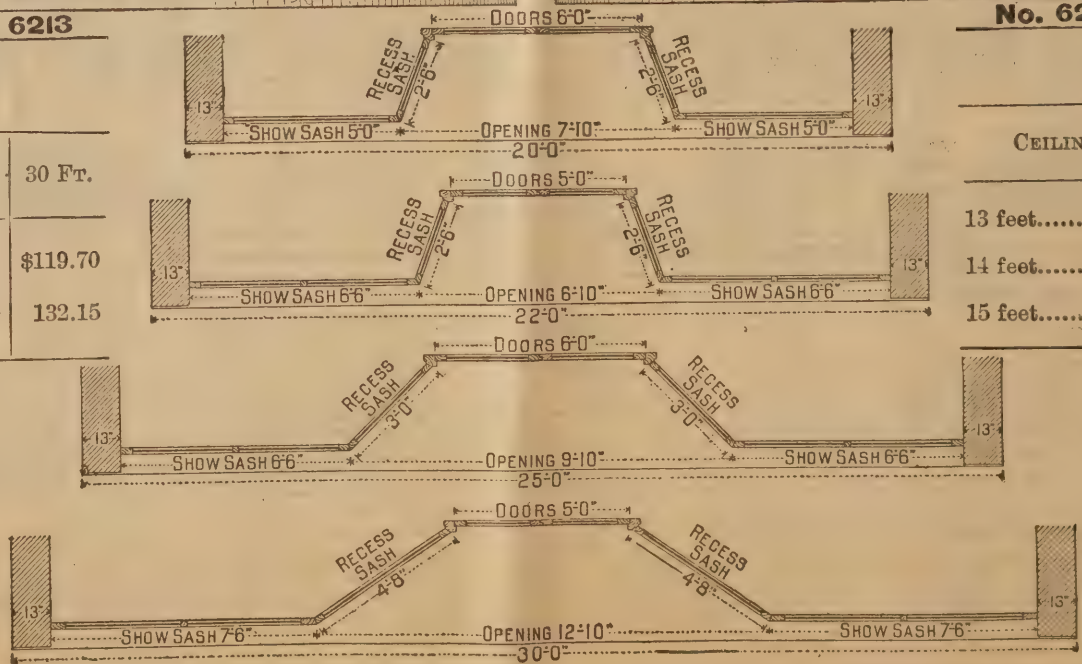
Prices include 4 show sash and transoms, 1 pair store doors, with posts and transoms; all glass for same of best double strength American.



These cuts illustrate our show sash, store doors and transoms for lower story of front for new structures, or where it is desirable to remodel only this part of the building. The designs show the work for 25-foot wide buildings, out to out walls; No. 6213 for ceilings 11 or 12 feet high; No. 6214 for ceilings 13, 14 or 15 feet high. All of our mill work is made from thoroughly seasoned white pine, finished to 1¾ in. thickness. Mouldings worked solid on frames and raised panels. We claim, without fear of contradiction, to have the best designed and constructed mill work that can be used for store front purposes. We prepare this stock in such large quantities, bringing the cost of production to a minimum, enabling us to offer it to our patrons at an exceedingly low price, and it is therefore *economy* to conform to our stock styles and sizes as illustrated.

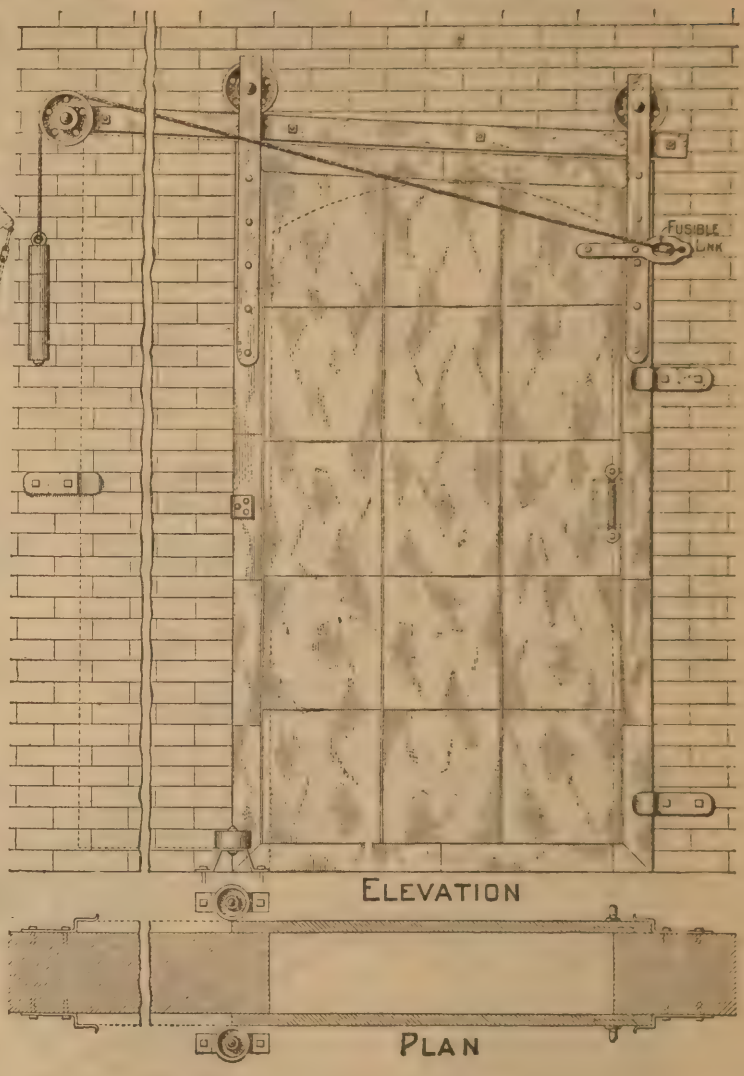
No. 6228



No. 6229

These illustrations are descriptive of various styles of **Metal Window Frames and Sash,** designed for buildings where fire-proof construction is desired.

The frame and sash are made of Galvanized iron, Copper or Plate Steel. All joints being thoroughly riveted and locked and then soldered, insuring strong, neat, flush joints that can not be separated by fire and present a smooth surface for finishing.

The entire construction is **Firm, Durable, Fire-Proof and Weather Proof,** the sash fitting snugly and being firmly locked when closed.

The sash are fitted with ¼ in. wire glass; box frames with top or bottom sash pivoted or both sash pivoted or counter balanced.

Metal Frames with wire glass, as a whole are windows and screens combined and fulfill every function of a window. They retard fire without hiding it, permit the blaze to declare itself, and approved by the National Board of Fire Underwriters.

Give number and size of openings, whether square or segment head, pivoted or counter balanced sash.

Tin Clad Automatic Fire Door.

The above cut shows the application of our **Automatic Sliding Fire Door.**

The Door closes automatically on the approach of fire. This is accomplished on the well known principle of fusible connection, which, is absolutely reliable. The door is weighted and held in balance by a fusible link. The arrangement is simple and reliable, and cannot be disturbed in using the door. Where subject to heat it acts promptly and the door closes tightly.

We are prepared to make special designs, to conform to any structural requirement that will meet with the approval of the National Board of Fire Underwriters.

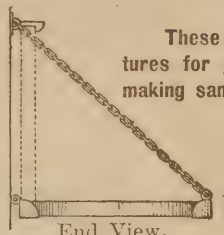
STEEL CELLS FOR COUNTY JAILS AND OTHER PRISONS.

No. 6345. Steel Bunk, Perforated.



End View.

These cells are intended for use as lockups or holdovers for police stations and can be used for jails in small cities and towns where expenditures for jail purposes are necessarily limited, but they can also be used for county jails, as they are built with our bent edge construction, making same perfectly impregnable. With this construction prisoners cannot possibly get at the bolts or rivets from the inside of cells.

DESCRIPTION OF STEEL STAIRS.

Our Steel Stairs, as shown by illustration No. 6233, are neat and attractive in appearance, strong and durable; being practically constructed they can be placed in position more easily and with less expense than any other. The treads and risers are formed in one piece and fastened to the stringers; brackets are placed at intervals and attached to hand rail. It will be readily seen that these features make the stairs a perfectly rigid construction. The platform and treads are roughened to prevent slipping.

In writing for estimates always give the rise and the run of stairs, and state width preferred. The standard width is three feet, but can be furnished any size desired.

Also state on which side Hand Rail is to be placed when ascending.

MESKER & BROTHER, ST. LOUIS, MISSOURI, U. S. A.

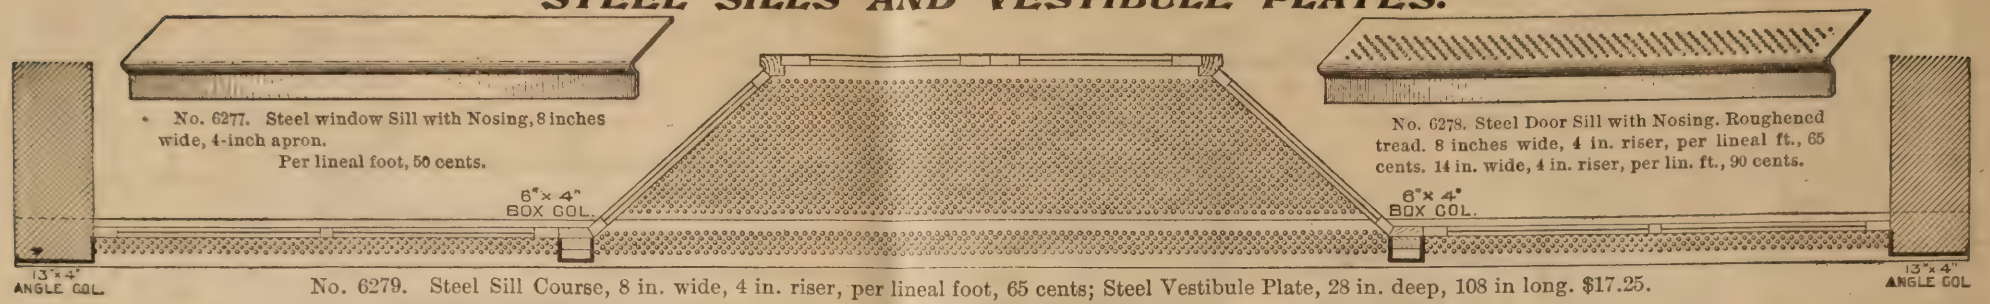
STEEL SILLS AND VESTIBULE PLATES.



No. 6277. Steel window Sill with Nosing, 8 inches wide, 4-inch apron. Per lineal foot, 50 cents.

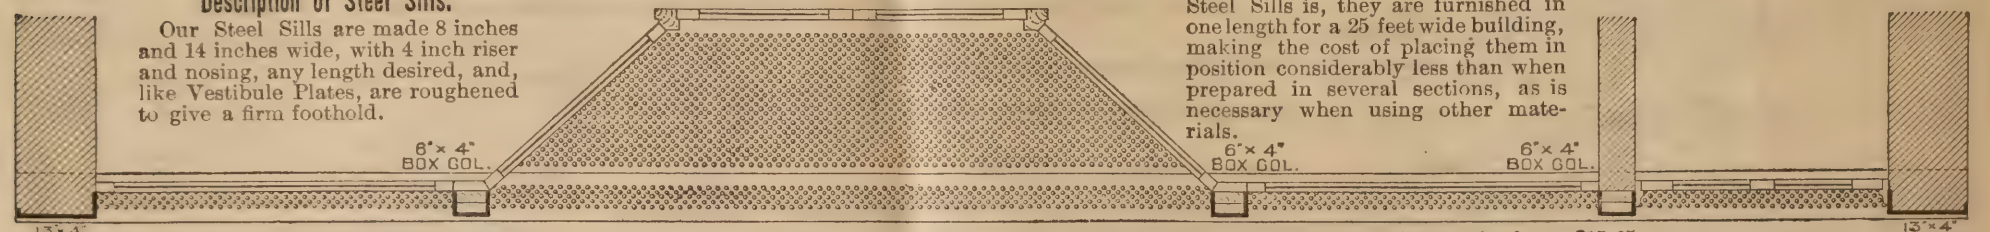
No. 6278. Steel Door Sill with Nosing. Roughened tread. 8 inches wide, 4 in. riser, per lineal ft., 65 cents. 14 in. wide, 4 in. riser, per lin. ft., 90 cents.

No. 6279. Steel Sill Course, 8 in. wide, 4 in. riser, per lineal foot, 65 cents; Steel Vestibule Plate, 28 in. deep, 108 in long. $17.25.

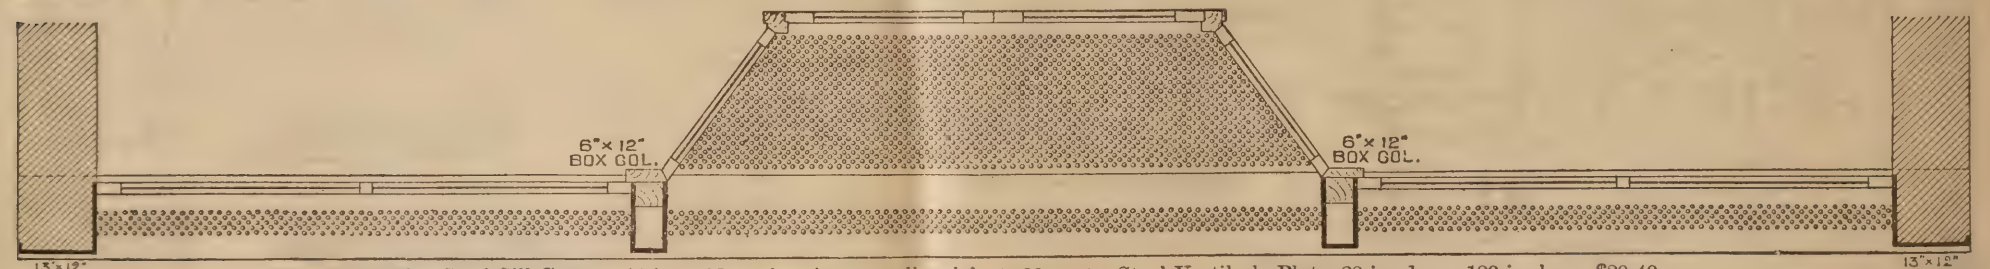
Description of Steel Sills.

Our Steel Sills are made 8 inches and 14 inches wide, with 4 inch riser and nosing, any length desired, and, like Vestibule Plates, are roughened to give a firm foothold.

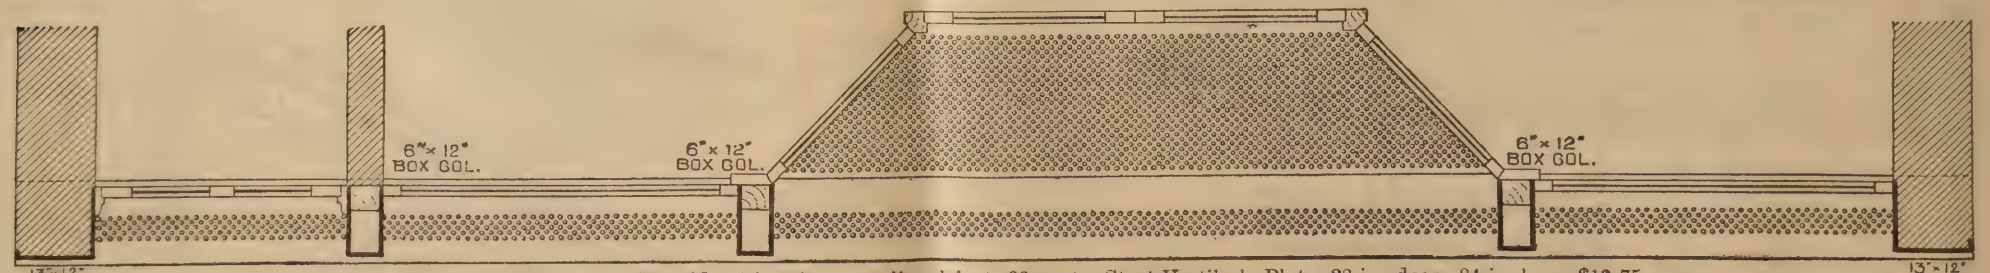
Another feature in favor of our Steel Sills is, they are furnished in one length for a 25 feet wide building, making the cost of placing them in position considerably less than when prepared in several sections, as is necessary when using other materials.



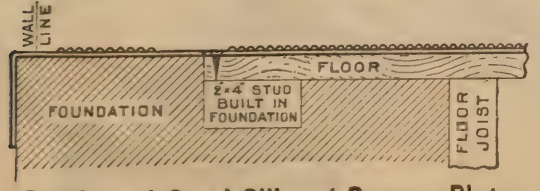
No. 6280. Steel Sill Course, 8 in. wide, 4 in riser, per lineal foot, 65 cents; Steel Vestibule Plate, 28 in. deep 96 in. long. $15.65.



No. 6281. Steel Sill Course, 14 in. wide, 4 in. riser, per lineal foot, 90 cents; Steel Vestibule Plate, 23 in. deep, 120 in. long. $20.40.



No. 6282. Steel Sill Course, 14 in. wide, 4 in. riser, per lineal foot, 90 cents; Steel Vestibule Plate, 28 in. deep, 84 in. long. $13.75.



Section of Steel Sill and Recess Plate.

WRITE FOR DISCOUNTS.

Steel Recess or Vestibule Plates.

The trend in the construction of buildings is to avoid the use of cast iron whenever at all possible, on account of the unreliability and the excessive weight necessary to be used to secure the desired strength. This fact has made Wrought Steel Floor Plates, as illustrated herewith, deservedly popular among architects, contractors, and others, upon whom rests the responsibility of designing structures in which strength and lightness must be combined. The illustrations herewith show our Steel Recess or Vestibule Plates in connection with our Steel Sill Course for Brick, and also for Galvanized Iron Fronts. We are prepared to furnish these Steel Plates and Sills cut to any desired sizes and shapes, the cost of fitting being no more than that of other less durable materials. They can be easily fastened to the flooring board, requiring no extra preparations to support the weight, as in the cast iron, and are much preferred by our customers. They are thoroughly practical, and are made with a roughened surface, giving a firm foothold, and prevent slipping A Vestibule Plate made in this pattern presents an extremely handsome appearance, equalled by no other material used for the purpose. The fact that 50 per cent. can be saved in weight and the strength increased over other materials is causing these plates to be largely specified for this purpose, and for stairways, fire escapes and platforms.

All prices quoted in this Catalogue are for work F. O. B. cars St. Louis, and are subject to 30% Discount.

Our patent Steel Columns for Brick and Galvanized Sheet Steel Fronts, as illustrated on this page, are made of the best plate steel, formed from one continuous sheet into the various shapes as shown by plans, and have been practically and thoroughly tested as to strength on Washington University (St. Louis) testing machine, by Prof. Calvin M. Woodward. Their superiority over Cast Iron Columns consists of the following advantages: One-half the weight of Cast Iron, making them easier to handle on a building; one-half the cost in freight; no blow holes, rough or uneven surfaces or hidden defects; no breakage in transit or from accident on building. In addition to all of these points in favor of our Steel Columns, they cost considerably less than Cast Iron, are nicely finished and ornamented and the carrying capacity is greater and more reliable. All intermediate, six inch face, Box Columns, are provided with two inch wood backing for securing of inside finish. Angle Columns for end walls, and Box Columns for partition walls, are provided with wrought iron stays at back, to permit anchoring to walls. Above we give a table of SAFE carrying loads, in tons, for Steel Columns as tested and calculated by Prof. Calvin M. Woodward.

DIRECTIONS FOR ORDERING.

In ordering Cornices always give total length from out to out. Cornices have no covering on top; they are to be covered with same material as roof. We furnish covering for Lintel Cornices, when ordered at 15 cents per foot extra. Our Cornices are thoroughly fireproof. The brackets and modillions are bolted to the Cornice, and the mouldings are run through solid. Our Cornices are fully complete, including wood lookouts for joints every ten feet apart, and are so constructed that they can be put up by any mechanic without difficulty. The cost of putting up our Cornices, owing to their simple construction, is a mere trifle.

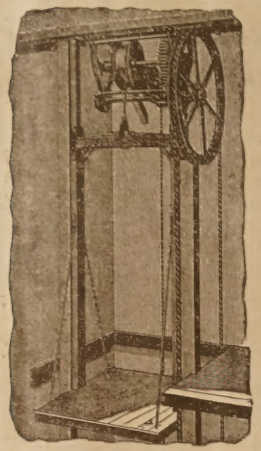
Wire Cable; 70 feet Manilla Hand-Rope, 1-in. diameter; 60 feet Hardwood Guides; 70 feet ⅜-in. Brake Line, with Sheaves; two Wire Rope Clamps; also Safety Attachment on Car.

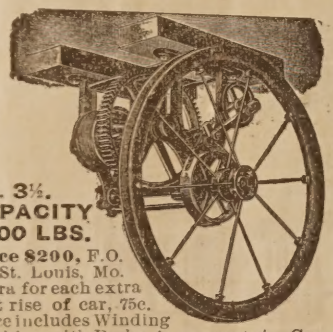
WRITE FOR DISCOUNTS

No. 1. CAPACITY 800 LBS.



Price $170.00. F. O. B. St. Louis, Mo.
Extra for each extra foot rise of Car, 60c.

Price includes Winding Machine with Automatic Clutch; Car, any size up to 4 ft. square; Counter-Weight, Counter-Weight Sheave, with Shaft and two Bearings; 35 ft. best half-inch Wire Cable; 70 ft. Manilla Hand-Rope, 1 in. diam.; 60 ft. Hardwood Guides; two Wire-Rope Clamps; also Safety Attachment on Car.

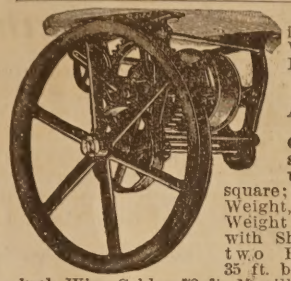


No. 3½. CAPACITY 1,500 LBS.
Price $200, F.O.B., St. Louis, Mo.
Extra for each extra foot rise of car, 75c.
Price includes Winding Machine with Brake Arrangement. Car No. 12, any size up to 5 ft. square; Counter-Weight, Counter Weight Sheave with Shaft and two Bearings; 35 ft. best Wire Cable, ½-in. diameter; 70 ft. Manilla Hand Rope, 1-in. diameter; 60 ft. Hardwood Guides; two Wire Rope Clamps; 70 ft. ⅜-in. Brake Line with two Sheaves; also Safety Attachment on Car.

No. 12. CAR WITH SAFETY ATTACHMENT.

This illustration shows style of Side Post Car used on all sizes of our Hand Elevators for freight service except No. 11. They are built of well-seasoned hardwood, strongly braced with bolts through timbers, either finished in natural wood or nicely painted. Usually made 6 ft. 3 in. high under beams. Can be built any size or shape to suit.

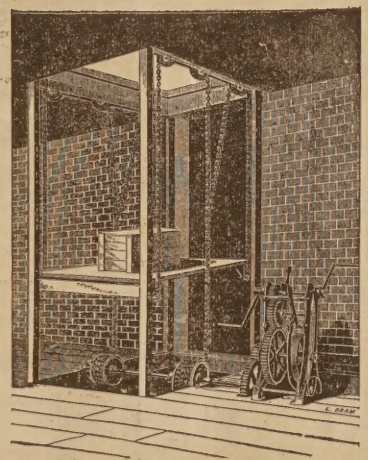
No. 3. CAPACITY 1,000 LBS.
Price $180.00. F. O. B. St. Louis, Mo.
Extra for each extra foot rise of Car, 60c.



Price includes Winding Machine with Brake Arrangement; Car No. 12 any size up to 4 ft. square; Counter-Weight, Counter-Weight Sheave with Shaft and two Bearings; 35 ft. best half-inch Wire Cable; 70 ft. Manilla Hand-Rope, 1 in. diam.; 60 ft. Hardwood Guides; two-Wire-Rope Clamps; 70 ft. ⅜ in. Brake Line with two Sheaves; also Safety Attachment on Car.

Instead of the Automatic Clutch used on No. 1, our Elevators Nos. 3, 3½, 4, and 5 are provided with an Improved Brake operated by a ⅜ in. line running from top to bottom of Hatchway over two Sheaves. By pulling one of these Ropes the Brake is brought into action for lowering the load, and a stronger pull on the same Rope locks Brake and holds Car and full load perfectly solid. A moderate pull on the other Line releases the Brake and holds same open, so there is no friction on any of its parts.

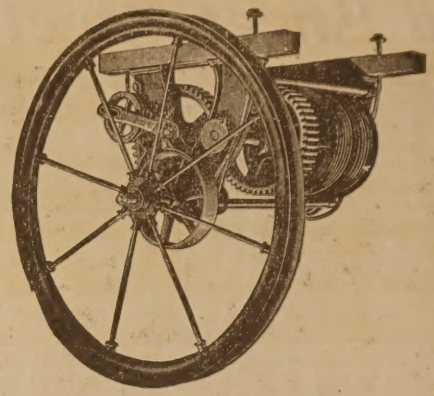
The Brake is made adjustable so that all wear can be taken up.



No. 14. IMPROVED FLOOR AND SIDEWALK HOIST.
Prices upon Application.

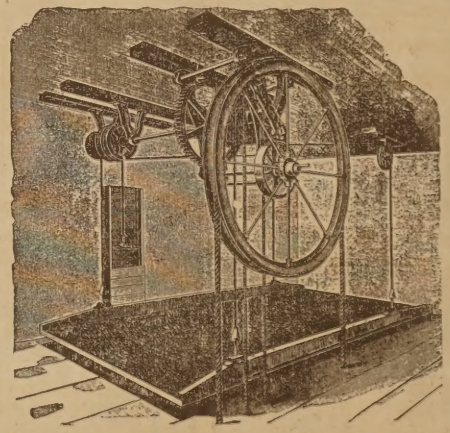
We furnish the entire outfit ready to set up, including Double Geared Winding Machine with Roller Bearings, Automatic Brake, two Cranks, Long Shaft with Winding Drums, four Steel Corner Posts, Wrought Iron Frame at top with six Sheaves, Cable Chains as required. We also furnish the same (if preferred) with two heavy Iron Posts instead of four at corners, as shown, with best Swedes Iron Hoisting Cables instead of Iron Chains.

No. 5. CAPACITY 2,500 LBS.
Price $297.00. F. O. B. St. Louis, Mo.
Extra for each extra foot rise of Car, $1.00.



Price includes Winding Machine with Brake Arrangement, all extra heavy and double-geared. Car No. 12, any size up to 6 ft. square; Counter-Weight, two Counter-Weight Sheaves, two Shafts, two Bearings; two 9-16 inch Wire Cables, 35 ft. each; 70 ft. Manilla Hand Rope, 1¼ in. diam.; 60 ft. Hardwood Guides, bored and counter-sunk; 70 ft. Brake Line and two Sheaves; also Safety Attachment on Car.

This machine has very heavy iron frame, complete, ready to be bolted to overhead timbers, and needs no other frame work. It is furnished with Steel Shaft of large size, running in Steel Roller Bearings. Drums spirally grooved to prevent cables from chafing. Double geared with pinions housed to points of teeth to give increased strength.



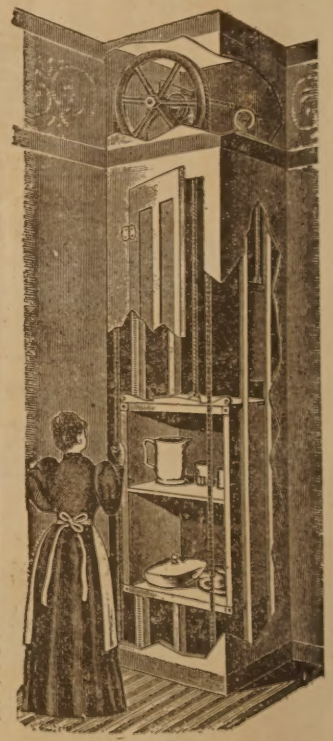
No. 11. Carriage or Wagon Elevator.
Prices on Application.

This cut shows our new Iron Frame Carriage Elevator erected ready for use. No posts or frame work are needed in its erection, as the frame bearings, sheaves and brackets are bolted to ceiling timbers, leaving all the space around hatchway clear. Two simple guide posts are used at back or on end of platform, running from lowest floor to top floor Five fine wire cables are used, one for each corner of platform and one for the counter-weight. The winding drums are spirally grooved to prevent cable from wearing.

No. 13. CAPACITY 500 LBS.
Price $130.00. F. O. B. St. Louis, Mo.

Price includes Winding Machine; Car, any size to 3 ft. square; two Carrying Sheaves, two Cable Clamps, Counter-Weight, Hardwood Guides, Manilla Rope, Cable and Boxing.

The material and workmanship on these elevators are of the best. Each machine is set up and tested before leaving the factory, and guaranteed in every way.



No. 15. Automatic Dumbwaiter.
Prices upon Application.

HIGHEST AWARD, GOLD MEDAL, UNIVERSAL EXPOSITION, ST. LOUIS, 1904.

Embossed Sheet Steel Ceiling.

No. 6190

Permanent durable, fire-proof and ornamental. Will not stain, crack nor fall off like plaster, nor shrink nor burn like wood. It is furnished in sheets 30 inches wide, 96 inches long, and is therefore put up at a much lower cost than any other style metal ceiling. It can be applied over an old wood or plaster ceiling without removing either, and does not require one-fourth as much furring as ceilings made in smaller sheets. Any mechanic can apply it easily. It is shipped not painted. Ceilings should be painted, after being placed in position, a color that will reflect as much light as possible. The wood strips or battens are not furnished, as they can be purchased at any lumber yard and the freight saved. When ordering give exact inside measurements. Shipments can be made in a few days.

Price $3.75 per square, including border, F. O. B. St. Louis, subject to discount.

No. 6343

The Mesker Fire Extinguisher

Is constructed from the best grade of Copper, is coated with pure lead, and made by the best of mechanics. The Mesker contains an absolutely air-tight, sealed Bottle, preserving the strength of the Acid, no matter how long it may be in the Bottle without use.
